Step-by-Step Instructions for Folding Dollar Bill Koi Fish

Now that you have your materials ready, let's dive into the step-by-step process of creating a dollar bill origami koi fish. For clarity, each step will be broken down into manageable parts.

Step 1: Prepare Your Bill

- Start with a clean, crisp dollar bill. Lay it flat on your workspace with the front side facing up.

Step 2: Fold the Bill in Half

1. Fold the dollar bill in half lengthwise, aligning the edges carefully.
2. Crease the fold firmly and then unfold the bill back to its original position.

Step 3: Create the Tail Fins

1. Fold the bottom corners of the bill up towards the center crease. This creates a triangle shape at the bottom, resembling the tail of the koi fish.
2. Flip the bill over and repeat the folding process to reinforce the shape.

Step 4: Form the Body

1. Fold the top of the bill down slightly to create the head of the koi fish.
2. Fold the sides of the bill inward, creating a streamlined shape for the body of the fish.

Step 5: Shape the Fins

1. Take the edges of the previous folds and pull them outward to form the front fins. Use your fingers to shape them and create a flowing appearance.
2. Adjust the neck of the koi fish by folding the top down further to create a more pronounced head.

Step 6: Final Touches

- Carefully adjust the body and fins of the koi fish to ensure it has a balanced and aesthetically pleasing look.
- You can create slight curves in the fins for added realism.
