Understanding the Korean Language

Korean, or "한국어" (Hangeo), is the official language of both South and North Korea. It is also spoken by ethnic Koreans in various countries around the world. The language has its own script called "Hangul" (한글), which consists of 14 basic consonants and 10 basic vowels. Hangul is known for its logical structure and simplicity, making it relatively easy for learners to grasp.

The Structure of Korean Words

Korean words can be broken down into syllables, each of which can be made up of a combination of consonants and vowels. This phonetic nature means that once you learn how to pronounce Hangul, you can read most words aloud, even if you don't know their meanings.

Pronunciation Tips

1. Listen and Repeat: One of the best ways to learn pronunciation is to listen to native speakers and try to mimic their sounds.
2. Practice with Vowels and Consonants: Familiarize yourself with the basic vowels and consonants in Hangul. This will help you sound out words more easily.
