Ingredient Considerations

- **Liquid:** Always add enough liquid for pressure cooking—usually a minimum of 1 cup.
- **Cooking Times:** Different ingredients have different cooking times. Consult the Fagor multi cooker manual for guidance on cooking times for various foods.
- **Layering:** When cooking, layer ingredients thoughtfully. Place denser items like potatoes at the

bottom and lighter vegetables on top.

3. **Clean the Valve:** Ensure the pressure release valve is free from food residue. You can use a small brush to clean it.
4. **Store Properly:** When not in use, store the cooker in a dry place with the lid off to allow air circulation.

Common Issues and Troubleshooting

Even the best appliances can run into issues. Here are some common problems and their solutions:

- **Burning Smell:** This may occur if food is stuck to the bottom of the pot. Always ensure there's enough liquid in the pot and use the sauté function carefully.
