## **Understanding Your Fellowes Paper Shredder**

The Fellowes paper shredder is designed to provide a secure and efficient way to dispose of confidential documents. Understanding the different models available in the Fellowes line can help users choose the right shredder for their needs. Fellowes offers various shredders, including strip-cut, cross-cut, and micro-cut options, each with distinct features and security levels.

Each model comes equipped with a range of capabilities, such as the volume of papers it can shred at once, the speed of shredding, and the duration it can run before needing to cool down. Users should consult their specific Fellowes paper shredder manual to familiarize themselves with their device's specifications and capabilities.

# Setting Up Your Shredder

Setting up your Fellowes paper shredder correctly is crucial for optimal performance. Follow these steps to ensure proper installation:

## Unboxing and Assembly

When you receive your Fellowes shredder, carefully unbox it and check for any damage. Make sure to have the following items:

- Shredder unit
- Power cord
- Waste bin
- User manual

Assemble the shredder according to the instructions provided in the manual. Ensure that all parts are securely attached and that the waste bin is positioned correctly.

## Choosing the Right Location

Place your shredder in a location that is easily accessible and near a power outlet. Avoid areas with excessive dust or moisture, as these can impact the shredder's performance. A flat, stable surface is ideal to prevent any wobbling during operation.

## Operating Instructions

Once your Fellowes paper shredder is set up, understanding how to operate it safely and efficiently is essential. Refer to the operating section of your manual for specific instructions tailored to your model.

## Powering On and Off

Most Fellowes shredders feature a straightforward power button. To turn on the shredder, simply press the power button. Always ensure the shredder is turned off when not in use to prevent accidental activation.

## Loading Paper into the Shredder

When feeding paper into the shredder, adhere to the following guidelines:

- Do not exceed the maximum sheet capacity indicated in the manual.
- Remove any staples or paper clips to prevent jams.
- Feed the paper straight into the slot to ensure it is shredded correctly.

For shredding credit cards or CDs, refer to your manual for specific instructions, as not all models can handle these materials.

## **Maintenance Tips**
