Sample Aptitude Test Questions and Answers

Below are sample questions across different categories of aptitude tests. The provided answers will help you understand the reasoning behind each solution.

Numerical Reasoning

Question 1: A shop sells a shirt for \$30 after offering a 25% discount. What was the original price of the shirt?

- A) \$35
- B) \$40
- C) \$45
- D) \$50

Answer:

Let the original price be x .

After a 25% discount, the selling price is $x - 0.25x = 0.75x$.

Given that $0.75x = 30$, we can solve for x :

$$x = \frac{30}{0.75} = 40$$

Thus, the original price was B) \$40.

Question 2: If a car travels 150 miles in 3 hours, what is its average speed?

- A) 40 mph
- B) 50 mph
- C) 60 mph
- D) 70 mph

Answer:

Average speed is calculated using the formula:

$$\text{Average Speed} = \frac{\text{Distance}}{\text{Time}}$$
$$= \frac{150 \text{ miles}}{3 \text{ hours}} = 50 \text{ mph}$$

Thus, the average speed is B) 50 mph.

Verbal Reasoning

Question 3: Which of the following words is the opposite of "abundant"?

- A) Scarce
- B) Plentiful
- C) Ample
- D) Overflowing

Answer:

The opposite of "abundant" is A) Scarce.

Question 4: Read the following statement: "All cats are mammals. Some mammals are dogs." Which of the following conclusions is logically valid?

1. All dogs are cats.
2. Some cats are dogs.
3. Some mammals are not cats.

- A) Only 1 is valid.
- B) Only 2 is valid.
- C) Only 3 is valid.
- D) All are valid.

Answer:

The only valid conclusion is C) Only 3 is valid. The statements do not support any direct relationship between cats and dogs.

Abstract Reasoning

Question 5: Identify the next shape in the sequence: Circle, Triangle, Square, Circle, Triangle, ...?

- A) Square
- B) Rectangle
- C) Pentagon
- D) Circle

Answer:

The sequence repeats every three shapes. Therefore, the next shape is A) Square.

Question 6: Which of the following patterns completes the sequence?

- A) ![Shape A]()
- B) ![Shape B]()
- C) ![Shape C]()
- D) ![Shape D]()

(As the shapes cannot be displayed here, you would typically analyze the shapes based on rotations, reflections, or color patterns).

Answer:

The answer will depend on the patterns presented in the actual images.

Mechanical Reasoning

Question 7: If Gear A turns clockwise, which direction will Gear B turn if it is directly connected to Gear A?

- A) Clockwise
- B) Counterclockwise
- C) No movement
- D) Depends on the size

Answer:

If Gear A turns clockwise, Gear B will turn B) Counterclockwise due to the nature of gear mechanics.

Question 8: A lever is used to lift a load. If the load is 200 kg and the distance from the fulcrum to the load is 2 meters, how far from the fulcrum should the effort be applied if the effort is 50 kg?

- A) 0.5 m
- B) 1 m
- C) 2 m
- D) 4 m

Answer:

Using the principle of moments:

$$\begin{aligned} & \text{Load} \times \text{Distance to Load} = \text{Effort} \times \text{Distance to Effort} \\ & 200 \times 2 = 50 \times d \\ & 400 = 50d \\ & d = \frac{400}{50} = 8 \end{aligned}$$

Thus, the distance from the fulcrum should be D) 4 m.
