Understanding the Esthetician Licensing Exam

1. Written Test

The written portion usually covers a variety of topics, including:

- Skin anatomy and physiology
- Skin disorders and diseases
- Product chemistry and ingredients
- Treatment protocols for different skin types
- Safety and sanitation practices
- Client consultation techniques

The written test is designed to evaluate a candidate's understanding of esthetic principles and their

ability to apply this knowledge in practical scenarios.

2. Practical Test

The practical portion of the exam assesses hands-on skills. Candidates are typically required to demonstrate:

- Facial treatments
- Hair removal techniques (e.g., waxing)
- Makeup application
- Spa treatments (e.g., body wraps)
- Proper sanitation and safety measures

Candidates must perform these tasks on a live model while being observed by an examiner.
