Product Overview

The Freedom Par Tri 6 is a versatile LED wash light known for its vibrant colors and robust performance. With a compact design, it is ideal for various applications, including stage lighting, events, and architectural illumination. This device features six tri-color LEDs that deliver exceptional brightness and color mixing capabilities.

Key Features

Understanding the key features of the Freedom Par Tri 6 enhances its usability. Here are some of the standout features:

- **Tri-Color LEDs:** Each light consists of red, green, and blue LEDs that allow for a wide range of color mixing and effects.
- **Battery Powered:** The unit is equipped with an internal battery, providing wireless operation and flexibility in placement.
- **Lightweight Design:** Designed for portability, the Freedom Par Tri 6 is easy to transport and set up.

- **DMX Compatibility:** Supports DMX control, enabling integration into larger lighting setups.
- **Multiple Operation Modes:** Users can operate the light in various modes, including sound active, master/slave, and DMX mode.

Setup Instructions

Setting up the Freedom Par Tri 6 correctly is crucial for optimal performance. Below are detailed setup instructions to guide users through the process.

Unpacking the Unit

Upon receiving the Freedom Par Tri 6, carefully unpack the unit and check for any visible damage. Make sure all components listed in the manual are included, such as the power adapter, user manual, and any mounting hardware.

Charging the Battery

Before using the device, it is essential to charge the internal battery fully. Connect the included power adapter to the unit and plug it into an electrical outlet. A full charge typically takes around 4 to 6 hours, providing up to 12 hours of operation depending on the usage mode.

Selecting a Location

Choose an appropriate location for your Freedom Par Tri 6. Consider areas where the light can be effectively utilized, such as stages, dance floors, or outdoor venues. Ensure that the light is placed on a stable surface or securely mounted to avoid accidents.

Operational Guidance

Once set up, understanding how to operate the Freedom Par Tri 6 will enhance your lighting experience. This section outlines the various operational modes and how to use them effectively.

Operation Modes

The Freedom Par Tri 6 offers several operation modes to accommodate different lighting needs:

- **Sound Active Mode:** The light responds to sound, changing colors and patterns based on the beat of the music.
- **Auto Mode:** This mode cycles through preset programs automatically without the need for

external control.

- **DMX Mode:** For advanced users, DMX control allows for precise adjustments and synchronization with other lighting fixtures.

Using DMX Control

To use the DMX mode, connect the Freedom Par Tri 6 to a DMX controller using standard DMX cables. Ensure that each unit is assigned a unique DMX address for proper communication. Refer to the DMX controller's manual for programming details specific to your setup.
