Setting Up Your GE Big Button Universal Remote

Control

Setting up the GE Big Button Universal Remote Control is a straightforward process. Follow these steps to ensure your remote is ready to control your devices:

Step 1: Insert Batteries

1. Open the battery compartment located on the back of the remote.
2. Insert two AAA batteries, ensuring the positive (+) and negative (-) ends are correctly aligned.
3. Close the battery compartment.

Step 2: Program the Remote

The programming process can vary slightly depending on the model of your remote, but the general steps are as follows:

1. Turn on the Device: Manually turn on the device you wish to program (e.g., your TV).
2. Press and Hold the Setup Button: Locate the setup button on the remote. Press and hold it until the red indicator light turns on and then release the button.
3. Select the Device Type: Press the button corresponding to the device you are programming (e.g., TV, DVD).
4. Enter the Code: Use the number keys to enter the code for your specific device brand. The red indicator light will turn off if the code is entered correctly. If not, the light will remain on.
5. Test the Remote: Try using the remote to control the device. If it doesn't work, repeat the process using another code from the code list provided in the manual.

Finding the Correct Code

You can find the correct device codes for programming in the provided manual or on the GE website. The codes are organized by brand, making it easier to find the right one for your device.
