## Equipping and Managing Artifacts

Once you have acquired your artifacts, it's time to equip them to your characters. Here's how to do it effectively:

### 1. Equipping Artifacts

To equip artifacts, follow these steps:

1. Open your character menu.
2. Select the character you wish to equip artifacts for.
3. Go to the "Artifacts" section.
4. Select the artifact slots (Flower, Plume, Sands, Goblet, Circlet) and choose the desired artifacts from your inventory.

Always aim to complete a set for the bonuses. For instance, equipping two pieces of Gladiator's Finale and two pieces of Noblesse Oblige will provide a balanced increase in physical and elemental burst damage.

### 2. Enhancing Artifacts

Enhancing your artifacts is crucial for maximizing their potential. You can enhance artifacts using other artifacts as fodder. Here's how:

1. Select the artifact you wish to enhance.
2. Choose other artifacts to use as enhancement material.
3. Confirm the enhancement, which will increase the artifact's main stat and sub-stats.

Remember, the higher the star rating of the artifact, the more effective it will become when enhanced.

### 3. Selecting the Right Main Stats

Choosing the right main stats for your artifacts can significantly impact your character's performance. Here are some recommendations:

- **For DPS characters:** Look for ATK%, CRIT Rate, or CRIT Damage.
- **For Support characters:** Focus on Energy Recharge, Elemental Mastery, or healing bonus.
- **For Tanks:** Prioritize DEF% or HP%.

## Tips for Optimizing Your Artifact Builds

To truly master the art of artifact management, consider the following tips:

### 1. Prioritize Main Stats

When selecting artifacts, prioritize those that enhance your character's strengths. For example, a damage dealer should focus on artifacts that boost damage output, while a support character should prioritize energy recharge or elemental mastery.

### 2. Farm Efficiently

Spend time farming specific Domains and bosses that drop the artifact sets you need. Use your resin wisely, and consider joining co-op mode with friends to speed up the farming process.

### 3. Keep an Eye on Event Artifacts

Participate in events and collect limited-time artifacts. These can often provide unique bonuses that can greatly benefit your team composition.

### 4. Balance Your Team

Ensure that your artifact builds complement your team's overall strategy. For instance, if your team relies on elemental reactions, focus on artifacts that enhance elemental mastery and reaction damage.
