Assembly Instructions

To assemble the vacuum, follow these steps:

1. Attach the wheels to the base of the vacuum for mobility.
2. Secure the tank lid to the main body of the vacuum.

3. Connect the hose to the appropriate inlet on the vacuum.
4. Select and attach the desired nozzle based on your cleaning needs.

Operating Instructions

Once the vacuum is set up, understanding its operating instructions is essential for effective use. The manual provides detailed steps to operate the Hyper Tough 15-gallon wet dry vac efficiently.

Starting the Vacuum

To start the vacuum, plug it into a suitable electrical outlet. Ensure that the power switch is in the 'off' position before connecting to power. Then, turn the switch on to begin operation.

Using the Vacuum

When using the vacuum, consider the following:

- For dry debris, ensure the appropriate filter is installed.
- For wet spills, remove the filter and ensure the foam sleeve is fitted.
- Move the vacuum along the surface to be cleaned, allowing the suction to gather debris or liquids.

Cleaning and Maintenance

Proper cleaning and maintenance of the Hyper Tough 15-gallon wet dry vac will extend its lifespan and ensure optimal performance. Users should refer to the manual for specific maintenance tasks.

Regular Cleaning

After each use, it is advisable to clean the vacuum. This includes:

- Emptying the tank of any collected debris or liquids.
- Cleaning the filter according to the manufacturer's instructions.
- Wiping down the exterior of the unit to remove dust and grime.

Filter Maintenance

The filter plays a vital role in the vacuum's performance. Users should check the filter regularly for clogs and replace it as needed to maintain suction power.

Troubleshooting Common Issues

Even with proper care, users may encounter issues with their Hyper Tough 15-gallon wet dry vac. The manual provides troubleshooting tips for common problems.

Low Suction Power

If the vacuum is not picking up effectively, check the following:

- Ensure the filter is clean and properly installed.
- Check for clogs in the hose or nozzle.
- Confirm that the tank is not full.

Vacuum Won't Start

If the vacuum fails to start, consider these steps:

- Check the power outlet and ensure it is functioning.
- Inspect the power cord for any damage.
- Ensure the power switch is in the 'on' position.
