Installation of the Intertek WL 100A Doorbell

Installing the Intertek WL 100A doorbell is a straightforward process. Here's a step-by-step guide to help you set it up easily.

Tools and Materials Needed

Before starting the installation, gather the following tools and materials:

- Screwdriver (Phillips or flathead depending on the screws provided)
- Screws (usually included with the doorbell)
- Battery (if required for the doorbell button)
- Level (optional, for precise alignment)

Step-by-Step Installation Guide

1. Choose the Location: Select an appropriate location for the doorbell button, typically near the entrance door at a height of about 48 inches from the ground.
2. Mount the Doorbell Button:
 - Use a level to ensure the button will be straight.
 - Mark the screw holes with a pencil.
 - Drill holes if necessary, then affix the button to the wall using screws.
3. Insert the Battery: If the doorbell button requires a battery, insert it according to the manufacturer's instructions.
4. Setup the Chime Unit:
 - Choose a location inside your home for the chime unit. It should be easily audible from various rooms.
 - Plug it into an electrical outlet or insert batteries as required.
5. Pair the Devices:
 - Most wireless doorbells come with a pairing process. Refer to the specific instructions in your manual to sync the doorbell button with the chime unit.
6. Test the System: Once installed, press the doorbell button to ensure the chime unit rings. Adjust the volume or change the chime sound as necessary.

Operating the Intertek WL 100A Doorbell
