Islam and the Destiny of Man

The question of destiny is a fundamental theme in Islamic theology and philosophy. In Islam, destiny—known as "Qadar" or "Taqdeer"—is intricately linked to the concepts of free will, divine knowledge, and moral responsibility. This article delves into how Islam perceives the destiny of man, exploring the theological underpinnings, the balance between fate and free will, and the implications for human life and ethics.

The Concept of Qadar in Islam

In Islamic belief, Qadar refers to God's divine decree and predestination. It encompasses all that has been preordained by Allah, from the creation of the universe to the minutiae of human existence. The Quran and Hadith provide guidance on this fundamental concept, emphasizing that everything happens according to Allah's will.
