History and Development

James Cameron, known for his innovative storytelling and technical prowess, began working on "Titanic" in the early 1990s. His fascination with the Titanic disaster stemmed from his childhood, and he believed that the story of the ship and its tragic sinking had to be told.

Initial Concept

Cameron's initial concept was to create a film that focused on the events surrounding the Titanic disaster while also weaving a fictional love story into the narrative. The film would follow two characters from different social classes, Jack Dawson and Rose DeWitt Bukater, who fall in love aboard the ill-fated ship.

Research and Authenticity

To ensure authenticity in the film, Cameron and his team conducted extensive research. They studied the historical accounts of the Titanic, interviewed survivors, and even explored the wreck site in the
